SCADA IMPROVEMENTS – BUTTE WATER TANK SITES
PROJECT NO. 3204401**

INTRODUCTION

The City of Tempe (City) completed a Supervisory Control and Data Acquisition System (SCADA) Master Plan. The plan included a project portfolio that identified several key projects designed to improve the SCADA system and ultimately provide a path for the intended vision of the SCADA system.

PROJECT EXECUTION

The City has decided to implement this project by dividing the scope of work between Red Oak Consulting, an ARCADIS U.S., Inc. group (Red Oak) and Brown and Caldwell (BC) specifically for efforts in Task 2, as well as JOC and Hard-bid Contracts for construction elements. The scope elements and summary scopes of work are as follows:

- Red Oak Consulting – The Red Oak scope of work (this document) consists of network design and configuration, control strategy document and development, PLC programming and HMI configuration and final system documentation.
- Brown and Caldwell (BC) – Via a separate contract with the City of Tempe, BC will provide Contract Documents for control panel design and modifications. Construction work will be completed by construction Contractor(s).
- Contractor(s) – Via separate contract(s) with the City of Tempe, JOC or Hard-bid Contractors will provide all field construction and control panel modifications. This work involves installation of City standard Programmable Logic Controllers (PLC) at each location as well as electrical field wiring and installation of instruments and other equipment required to support integration of these sites into the overall SCADA system.
- City of Tempe – City IT will purchase IT related equipment required for this project (i.e. network equipment, SCADA software licenses).

Red Oak has included efforts for coordination with all parties above throughout design and implementation as there will be significant coordination required during construction and system startup.

SCOPE OF WORK

Task 1 – Project Management and Coordination

Task 1.1 – Project Management: Red Oak will conduct a kickoff meeting to coordinate the project with impacted City of Tempe staff. Red Oak anticipates attendance at the kickoff meeting from Tempe Water Utilities project manager, IT network staff, instrumentation and control (I&C) technician, operations supervisor and Brown and Caldwell design staff. The purpose of the meeting will be to ensure that all affected parties understand the scope of work and any potential impact to operations.

Red Oak will provide Project Management for the Red Oak project including invoicing and progress reports on a monthly basis throughout the project duration.

Task 1.2 – Project Coordination: Consultant will develop and maintain a Master Schedule including activities for work to be performed by the Consultant, BC, JOC and/or Hard-bid Contractor and the City (procurement of hardware, final configuration of network equipment). Consultant will conduct monthly progress meetings to ensure that all parties are coordinated and report progress to the City Project Manager. Additionally, Red Oak will attend regular construction progress meetings with JOC and/or Hard-bid Contractor throughout construction phases.

Task 2 – Field Site Network Upgrades

Red Oak will provide services to integrate the key field sites into the SCADA network and upgrade the existing field controllers to meet the City standard for PLC controllers. This effort will upgrade the following sites: Papago Butte Reservoir, Hayden Butte Reservoir, Belle Butte Reservoir.

Task 2.1 – Network Design & Implementation:

As-Is Documentation – Red Oak will develop a detailed “as-is” network diagram Papago Butte Reservoir, Hayden Butte Reservoir and Belle Butte Reservoir networks in Microsoft Visio format. The network diagram will document existing network communications (radio and City connections). The task will require assistance from the City IT network and I&C staff.

Network Design – Red Oak will develop a detailed “to-be” network design for these critical sites. The network design will provide all details necessary to perform the physical upgrades to the network to meet current City enterprise network standards. Information provided will include 1) detailed bill of materials for purchase by the City 2) point to point connections for fiber optics and Ethernet, and 3) a recommended sequence and schedule for installation and implementation of equipment. Red Oak will develop a DRAFT of the design for review by the City and will receive feedback and adjust accordingly. A FINAL DRAFT will be submitted for review. Particular attention will be paid to ensuring that Fields Sites to be upgraded in the future can securely communicate with the new Field Site servers being implemented in Task 3.

Implementation – This task involves the installation; configuration and testing of the network upgrade, as well as transfer of existing equipment (PLC, HMI) over to the new network after completion of systems testing. Red Oak understands that the City will purchase all equipment required for this project under a separate contract and will procure services of a Contractor for installation of communications and control system equipment in existing control panels as well as installation of any new instrumentation at the reservoir sites.

Final Documentation – Red Oak will update the FINAL DRAFT network drawings based on any changes or clarifications during the implementation phase. Upon completion, Red Oak will deliver the FINAL network design to the City in Microsoft Visio and AutoCAD format. The FINAL design will be signed and sealed by a registered engineer.

Task 2.2 – PLC Programming and Configuration –Implementation of Add-On Instructions and related elements per SCADA Standards. Initially, raw I/O will not be in-place only tags read by the new HMI project. Raw I/O will be mapped to the new locations proceeding commissioning. This effort will be directly coordinated with Task 3.4 to implement PLC and HMI programming as systems are brought online.

Task 2.3 - Startup and Testing – After completion of B&C work, which includes installation of controllers and basic I/O checkout, Red Oak will complete startup and testing, following HMI hardware/software installation. Initial testing will include testing of the PLC/HMI compatibility (tag-to-tag function). Once compatibility is confirmed, raw I/O will be connected and function will be tested with the live system. Systems will be tested and brought online one-by-one. For Papago Butte, system checkout will be coordinated with startup of the JGM facility, which is being upgraded under a separate contract between the City of Tempe and Red Oak.

Task 3 – Field Site Software/Hardware Upgrade

This task includes an implementation of new server hardware and software to manage all the Field Sites.

Task 3.1 – Red Oak will conduct coordination meetings to determine and review the final location for the Field Site servers and coordinate efforts related to Field Site Network upgrades.

Task 3.2 - HMI Configuration/Programming: Implementation of Super Genies/Genies and related elements per SCADA Standards. Function of the process control will not be changed but HMI aesthetics (particularly with valves, pumps, and other common equipment) will be updated per SCADA Standards. Consultant assumes development of additional standard templates will be required to provide reverse compatibility with field sites that are not yet upgraded to the City standard hardware.

Task 3.3 - HMI Screen Review Workshops: Red Oak will conduct HMI Screen Review Workshops that correspond to each Field Site. Input from these workshops in correlation with the SCADA Standards will be used to implement updates and create a final HMI project.

Task 3.4 – Data Collection and Reporting: Red Oak will coordinate the collection of data from Field Sites to ensure that all historical data collected by the Field Site servers is delivered to the global Historical server. As part of this task Red Oak will coordinate two workshops with City staff to validate planned data collection parameters and report development.

Task 3.5 - System Commissioning: Following HMI hardware/software installation. Initial testing will include testing of the PLC/HMI compatibility (tag-to-tag function). Once compatibility is confirmed, raw I/O will be connected and function will be tested with the live system. Field Sites will be tested and brought online one-by-one.

Task 4 – HMI Globalization and STWTP Data Collection/Storage Optimization

After completion of the previous tasks, Red Oak will provide upgrades and coordination to ensure that all SCADA systems (JGMWTP, STWTP, Field Sites) are fully integrated as a global system. Red Oak will conduct workshops and receive feedback on new “global” screens that will provide a City-wide capability for monitoring and controlling all sites connected to the upgraded SCADA network. Upon completion of this task, all SCADA systems will be upgraded to the same software version and all older SCADA components will be decommissioned.

As part of this task Red Oak will conduct a workshop to review all existing data sources to ensure that all critical operational data is made available to the City in one location. This workshop will include review of existing paper-based data, SCADA logs and other data sources. Based on the input from the workshop, Red Oak will develop procedures for data migration and compilation into Historical data system.

Task 5 – Update SCADA Standards

Implementation of the Field Sites will generate new programming standards and require updates to existing standards. Red Oak will update the existing SCADA Standards portal and document to reflect changes.

KEY ASSUMPTIONS

- City will purchase, install, and provide basic Microsoft Windows operating system configuration for all servers (2 SCADA) under separate contract. Red Oak will install the new SCADA software on equipment provided by the City.
- As needed, City to purchase network equipment based on the final network design.
- Network Baseline Assessment – Red Oak will require assistance from the City of Tempe IT department onsite at all facilities impacted.
- Interruption to SCADA communications is expected during network implementation. This includes IP changes for PLCs and PLC-to-PLC communication logic.
- This scope of work does not include correction of any work performed by other consultants under separate direct contract with the City.

COMPENSATION

The Consultant understands that the City will execute this project as a lump sum contract, based on the fee schedule (attached). Attachment A details the proposed fee, including a breakdown of hourly effort per task and resource.

Attachment C details the estimated cash flow for the Consultants efforts related to this work. The Consultants rate of work effort will not exceed the amounts in the table provided in Attachment C.

PROJECT SCHEDULE

The proposed project schedule is included in Attachment B.

Guidelines for Implementation of Health Insurance

These Guidelines are provided for purposes of implementing Resolution No. 2000.73, which requires all employees of prime consultants, general contractors and major subconsultants and subcontractors to have health insurance and to offer health insurance to their eligible dependants, as determined at the start of each project. Questions regarding these guidelines should be directed to the City of Tempe Engineering Division at (480) 350-8200.

1. All Prime Consultants who enter into a Public Works contract or General Contractors who bid on Public Works projects that are advertised for bid and enter into a contract in excess of \$30,000 with the City of Tempe after January 1, 2001, are required to sign an affidavit in the form attached hereto. The prime consultant or general contractor shall require that all major subconsultants or subcontractors, defined as entities doing work in excess of \$30,000, comply with the health insurance requirements. In signing the affidavit, prime consultants and general contractors may refer to and rely upon these Guidelines for interpretation.
2. Health insurance is required for permanent employees who work for the consultant/contractor more than one hundred and twenty (120) days in any calendar year. A "work day" consists of any time within a twenty-four hour period, regardless of number of hours that the individual is paid. This requirement excludes students working part-time who are enrolled in a recognized educational institution. Many companies have a grace period or a qualifying period prior to commencement of insurance coverage, which is acceptable so long as the employee coverage begins by the 120th day of contract signing. Temporary employees will be covered to the same extent as the City of Tempe covers temporary employees as determined at the start of each project.
3. If a contractor is a "Union" shop and withholds union dues from employees for health insurance coverage that is also offered to their eligible dependents and meets all City requirements, the Contractor may so note on the required affidavit.
4. The health insurance requirements herein apply to all employees that are directly involved with the City of Tempe project including support and administrative personnel.
5. Health insurance coverage must be maintained during the entire time of the contract, including any warranty periods, with the City.
6. All complaints concerning violations of the health insurance requirements shall be filed by an employee, in writing, with the Public Works Department, within thirty (30) days from discovery of the violation. An administrative hearing will be held before the Public Works Director, and a written decision of findings will be provided to the parties to the hearing within ten (10) days thereafter. Appeal from the decision

of the Public Works Director may be made within ten (10) days of the date of the decision by filing a notice of appeal in writing with the Public Works Department. If an appeal is timely filed, an administrative hearing will be held before an administrative hearing officer appointed by the City Manager. The decision of the administrative hearing officer shall be final.

7. In the event of a finding by the City of a violation of the insurance provisions, the company in violation of the provision shall be barred from bidding on, or entering into, any public works contract with the City for a minimum period of three (3) years.
8. All consultants and contractors subject to the health insurance requirements shall post, in English and Spanish, notice of the health insurance requirements at their office and at the job site. Signs for posting will be provided by the City.

These "Guidelines for Implementation of Health Insurance", issued and dated this 21st day of August, 2002, hereby amend all guidelines previously issued.
