Council Committee of the Whole (Sept. 17, 2015)

The Rio Salado Project: Initiated in 1966 by ASU (design studio)

Town Lake Vision

Objective:

Seeking City Council further discussion and direction on the vision for Town Lake and future projects at the Pier 202 / Southbank site

ASU Stadium District – master plan

RFP "Town Lake Design" Document

TOWN LAKE DESIGN

RESIDENTIAL

Each residential unit has access to sizable private outdoor space which is essential for healthy urban living in higher density areas.

Building incorporates passive solar techniques for shade mitigation (movable cantilevers, shaded windows, shaded overhangs, plant shelves)

Site is well-landscaped to promote softening of hard edges - lines, and to reduce energy costs and urban heat island effect.

Buildings are contemporary in design with a mix of unit types (studio, 1 + 2 bedroom, penthouse), each offering individual access to private outdoor space.

Architecture addresses the site through unique, site-specific design to maximize views of surrounding lake, mountain, and city skyline.

Buildings have a relationship to the waterfront; a dialogue.

TOWN LAKE VISION

Town Lake excerpt provided out of the
“Community Design Principles” plan, 2006

“The “Crown Jewel” of Rio Salado, the lake is a focal point to which visual and physical access must not be impeded”

“Rowing competitions and recreational boating suggest nautical (design) references”

“Linear parks surround lake, linking building sites, providing a unifying element”

“Ground floor building uses relate to public spaces, reinforced by form rich in detail and substantial in mass”

“Views to the lake from upper levels are maximized...”

“...and enhanced by expressive structure(s) and (building) technology”

“Pedestrian and retail linkages to Downtown are essential”
